DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on 4/26/07 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kroll et al. US 4,594,081.

Kroll '081 discloses a method for cleaning a gas stream comprising adding water to the gas stream and condensing at different locations (see abstract and columns 2-3).

Kroll '081 fails to disclose continuous adding and condensing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to continuously add and condense in the method of Kroll because Kroll discloses

continuously neutralizing the water scrubbing agent (column 5, lines 46-47).

Regarding claims 2-8, although apparatus limitations are not unduly weighted in method claims, Kroll '081, in any case, discloses nozzles and a scrubber (see abstract and column 1, lines 17-24).

Regarding claims 9-12, Kroll '081 discloses a fan and blower (see column 5, lines 31-45 and column 7).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saget US 4,361,490 discloses a process for centrifugal separation of streams (abstract, claims); and Roe US 3,645,070 discloses a method for cleaning a gas stream comprising adding water to the gas stream (abstract).
